

RigidTrack/communication.h

```
graph TD; A[RigidTrack/communication.h] --> B[QObject]; A --> C[qpixmap.h]
```

The diagram illustrates the dependencies of the RigidTrack/communication.h header file. It is shown as a central box at the top, with two arrows pointing downwards to two separate boxes below it. The left box is labeled 'QObject' and the right box is labeled 'qpixmap.h'. This indicates that the communication.h header file includes or depends on both the QObject class and the qpixmap.h header file.

QObject
